# CELION

Where technology meets security

— WHERE IT ALL STARTS

# Sound familiar?

01

### Data in three systems

Reports are compiled by hand and the numbers disagree between departments.

02

### Processes live in people's heads

When someone leaves, the knowledge of how it all works leaves with them.

03

### The contractor vanished

Undocumented code, no access, and nobody left to develop the product.

04

### Security «put off»

There has never been an audit, and customer data is already in the system.

This is exactly the stage we step in — and we start with an audit, not with code.

— TRUSTED BY

WHAT WE DO

# Three directions

## Products

Web and mobile apps, marketplaces, fintech, portals. From mockup to release and support.

Laravel · React · iOS · Android

## AI and automation

Agents in Telegram and CRM, document and call analysis, BPMN process models, API integrations.

Claude · Odoo 18 · BPMN

## Security

Pentesting, infrastructure audits, incident response. This is where we began and it remains our foundation.

Pentest · Audit · DevOps

CASE 01 / 04

# UFarmer

## Agritech · superapp

A superapp for farmers, agronomists and exporters: land and crop records, marketplace, agri-services, wallet. MyID verification, offline tasks with a sync queue.

HOW WE GREW

# From security audits to products

## 2024

### We broke other people's systems

Pentesting and infrastructure audits. Clients came to us to find out where the holes were.

## 2025–2026

### We build products and AI

Full cycle: product, ERP, AI agents. Odoo and Claude partnerships, government clients.

— TESTIMONIALS

# In our clients' words

"

Celion acted as an outside «cleaner» for our systems — they found what we could not see ourselves.

My Taxi
2024

"

The work was done professionally and on time. We recommend them as a reliable partner.

NASP under the President of Uzbekistan
2025

"

The team dug deep into our processes and offered a solution, not just code.

HOW WE WORK

# Three principles

## Honesty

If the job can be done cheaper, or does not need doing at all, we will say so before any contract.

## Flexibility

We work in sprints. Priorities can change along the way without re-signing everything.

## Accountability

Status twice a week: what is done, what is next, where the risks are. No «everything is on track».

# Tell us about your project — we will come back with an estimate in 3–5 days
