No. 30/05

"30" May 2024 Tashkent

Dear partners and colleagues!

We, the Olcha team, would like to express our sincere gratitude to the Celion team for their attention to detail and professionalism in identifying and fixing the vulnerabilities of our website. Their ability to identify complex security issues and offer effective solutions has helped us significantly improve the security of our data and services. Their work has undoubtedly played a key role in protecting the interests of our clients and strengthening trust in our brand.

I would especially like to highlight their approach to work: each stage of the process was clearly planned and carefully executed. The Celion team not only identified vulnerabilities, but also trained our staff in security principles, which allowed us to create a more resilient and secure infrastructure.

Thanks to their efforts, we were able to implement new security standards that not only protected our systems, but also improved the overall user experience on our site. They helped us avoid potential threats and prepare for future cybersecurity challenges.

We highly value their contribution and look forward to continuing our fruitful cooperation. We are confident that "Celion" will continue to provide the same high-quality services to other companies striving for excellence in the field of information security.

Sincerely,  
Olcha Store Team.

We would like to express our sincere gratitude to Celion for their exceptional information security services. In a world where cyber threats are becoming increasingly complex, protecting our online resources and customer data is a top priority for Mediapark.

Working with "Celion" has been a great satisfaction for us. They have carried out a comprehensive analysis of our systems and implemented effective security measures that meet the highest standards. Particularly noteworthy is their individual approach to our needs and their quick response to any emerging threats.

We deeply appreciate their professionalism and willingness to meet the client halfway. Thanks to their efforts, we can focus on developing our business, knowing that our information security is in good hands. We recommend "Celion" to anyone looking for a reliable partner in the field of cybersecurity.

Sincerely,  
Zakirov Sh.N.  
Director

May 27, 2024

It is with great pleasure that we would like to share our positive experience of cooperation with the company "Celion", which provided us with exceptional services in the field of information security. In these times, when cyber threats are becoming increasingly sophisticated, protecting the data and systems of our customers is a priority for "Elmakon".

The employees of "Celion" demonstrated a high level of professionalism and competence. Their approach to implementing solutions was carefully thought out and adapted to our specific needs, which allowed us to minimize risks and strengthen our information security. The team was always in touch and promptly responded to any questions that arose, which ensured

We are confident that "Celion" will continue to provide high-quality services to its customers and recommend them to anyone who needs reliable and professional support in the field of cybersecurity.

Zokirov N.Kh.

Top Brains would like to express its sincere gratitude to the Celion team for their expert analysis and professional intervention in improving our cybersecurity. The work they have done, including identifying and fixing complex vulnerabilities, has significantly HELPED us to secure our customers' confidential information and improve the overall security level of our systems. This contribution is of great importance to our business, and we highly value their professionalism and dedication to their work.

Moreover, the team at "Celion" offered us a strategic plan for long-term improvement of our security system, including regular checks and updates. Their comprehensive approach to solving security problems helped us not only to eliminate current vulnerabilities, but also to prepare for future challenges. Their work has provided us not only with reliable protection, but also with confidence in the security of our information infrastructure, which is critical to our success.
